DRONCO is one of Europe's leading companies in the area of abrasives manufacture and sells its products in some 100 countries internationally. Our range of cutting, grinding and sanding discs, diamond tools, ceramic abrasives, abrasive papers and technical brushes for the professional craftsman and demanding DIY-er are widely known and manufactured to a high quality standard acknowledged worldwide. The world's most modern manufacturing technology for cutting and grinding discs, plus highly-qualified employees make possible competitive production in Germany in accordance with the highest quality guidelines and strictest safety standards. DRONCO is a member of oSa (Organization for the Safety of Abrasives).

Finish. First.

OSBORN is technology leader and the world's largest manufacturer of tools and application solutions for surface finishing. We supply our products in more than 120 countries around the globe from manufacturing sites and sales organisations in 14 countries. In addition to 10,000 standard products OSBORN can provide more than 100,000 tailor-made customer solutions. The top-quality products are used in all manner of industrial and craft applications. The product range includes technical brushes, roller brushes, polishing and grinding tools, polishing emulsions and solid compounds, idler rollers and cam followers. OSBORN is the only manufacturer in the industry to provide TÜV-SÜD certification for more than 700 items in its retail range.

CORDLESS IS KING

More power, longer battery life and no cables: the new generation of cordless power tools, make work easy, even if there is no electricity socket available.

Battery life and the actual performance of these tools, has made a huge leap in recent years. Cordless power tools are now an alternative for a whole range of users. Whether on construction sites, or for plumbing, HVAC, janitor services, firefighting and mobile emergency units, cordless power tools are now considered an essential piece of equipment.

WHY SPECIAL TOOLS?

In order to work flexibly and cordlessly, powerful cordless equipment demands the right tools.

Regardless of cutting, grinding, brushing, cleaning, polishing or satin finishing – tools, made for conventional electrical equipment, have a very limited scope.

They are usually too heavy and generally not sufficiently multi-purpose. Especially for mobile use, where speed and precision are mandatory, conventional tools are not the answer.

Heavy tools will soon drain the battery and it will be necessary to charge repeatedly. Switching from one tool to the next for different applications is time consuming.

CPT ACCESSORIES

WE MAKE IT EASY FOR YOU

OSBORN AND DRONCO have developed accessories which are flexible in use, light weight, easy to handle and assure highest precision.

The end result will meet all your expectations and fulfill all aspects of work safety. This is the only way to work effectively and get the best out of your cordless power tool.

ADVANTAGES

- Low weight
- Precise working
- Flexible in usage
- Easy to handle
- Reduced imbalance and vibration
- Longer battery life (plus 30%)
- Fewer charging cycles
- Universal usage on all materials

OUR EXPERIENCE, YOUR ADVANTAGE

In the field of special filaments, we have long-standing experience. We have chosen comparatively lightweight materials that are ideal for different applications and materials.

On a specially developed test-bench, we carried out extensive tests to optimize various configurations. The resulting tools have a very effective trim (e.g. abrasive nylon filament), which is both versatile in use and lightweight, in turn battery life is prolonged and battery charging cycles minimised. Positive side effects include reduced imbalance and vibration.

ADVANTAGES ABRASIVE NYLON

- Nylon filaments with silicon carbide
- Uniform performance as new abrasive particles are continuously released during the work process
- Light, therefore battery life friendly
- High elasticity with no risk of breakage
- Long service life
- For deburring, descaling, roughening and grinding
- On all metals, hard and soft wood and ceramics
- A separate finishing step with additional grinding tools is not necessary

CUTTING ALLROUND

Dronco Superior DB4

Diamond brazed cutting disc

Essential allrounder for universal use on all construction sites: The steel blade is diamond coated. Cuts stone, (reinforced) concrete, granite, sandlime stone, bricks, non-ferrous metals, plastics, glas, rubber, carbon fibre and wood. For wet and dry cutting.

Dimension	Dimension	Speed	Number of Segments	Height of Segments	Content	Shape	Item No.	Bar Code
mm	inch	R.P.M.		mm	PC			4081600
115 x 2,4 x 22,23	4 1/2 x 3/32 x 7/8	13280	9	6,0	1	C 3	4114208	040302

CUTTING AND GRINDING STAINLESS STEEL, STEEL

Dronco Special AS 46 T INOX CUT + GRIND

Free hand metal cutting disc

The first cutting disc you are also allowed to use for light grinding. First cut, then deburr and grind with only one disc. Suitable for steel and stainless steel for both solid material and profiles.

Dimension	Dimension	Speed	Content	Shape	Item No.	Bar Code
mm	inch	R.P.M.	PC			4081600
115 x 2,5 x 22,23	4 1/2 x 3/32 x 7/8	13280	25		1113270	113600
125 x 2,5 x 22,23	5 x 3/32 x 7/8	12200	25		1123270	123609

CUTTING STAINLESS STEEL, STEEL

Dronco Special AS 60 T INOX FreeCut

Free hand metal cutting disc

For cutting steel and stainless steel, non-ferrous metal. Suitable for both, thin- and thick-walled profiles and solid material.

Pleasant, quick and safe cutting. No jamming during cutting, no kick-back effect of the angle grinder due to tapered shape of the disc.

Dimension	Dimension	Speed	Content	Shape	Bar Code	Item No.
mm	inch	R.P.M.	PC			4081600
115 x 2,0/1,0 x 22,23	4 1/2 x 5/64-1/25 x 7/8	13280	25		1111340	111507
125 x 2,0/1,0 x 22,23	5 x 5/64-1/25 x 7/8	12200	25		1121340	121506

CUTTING STAINLESS STEEL, STEEL, STONE

Dronco Special ACS 60 T MULTI

Free hand metal cutting disc

Perfect combination tool for sanitary installation work: Cutting of metal and tiles without a change of disc. Good cutting performance, low-burr to burr-free edges. For stainless steel, steel, stone and especially wall tiles.

Dimension	Dimension	Speed	Content	Shape	Bar Code	Item No.
mm	inch	R.P.M.	PC			4081600
115 x 1,2 x 22,23	4 1/2 x 3/64 x 7/8	13280	25		1111360	111804
125 x 1,2 x 22,23	5 x 3/64 x 7/8	12200	25		1121360	121803

CUTTING, STAINLESS STEEL, NON-FERROUS METAL, COMPOSITE MATERIALS (FRP)

Dronco Evolution AS 60 V 1mm

Free hand metal cutting disc

By far the best disc for cordless angle grinders. Quick cutting with minimum force, outstanding service life and lowest battery consumption for low-burr or burr-free edges. For thin sheet metal, steel ropes, thin-walled profiles and tubes.

Dimension	Dimension	Speed	Content	Shape	Item No.	Bar Code
mm	inch	R.P.M.	PC			4081600
115 x 1 x 22,23	4 1/2 x 1/25 x 7/8	13280	25		1111246	111125
125 x 1 x 22,23	5 x 1/25 x 7/8	12200	25		1121246	121179

CUTTING ALUMINUM

Dronco Special CS 60 ALU

Free hand aluminum cutting disc

For aluminum and non-ferrous metal. Quick cutting without clogging. Can also be used for most synthetic materials.

Dimension	Dimension	Speed	Content	Shape	Item No.	Bar Code
mm	inch	R.P.M.	PC			4081600
115 x 1,2 x 22,23	4 1/2 x 3/64 x 7/8	13280	25		1111150	111163
125 x 1,2 x 22,23	5 x 3/64 x 7/8	12200	25		1121150	121063

CUTTING TILES, STONEWARE

Dronco Evolution F5 ceraspeed

Diamond cutting disc

Extra thin disc and cutting rim in special geometry to ensure clean edges, quick cutting and long service life.

Dimension	Dimension	Speed	Number of Segments	Height of Segments	Content	Shape	Item No.	Bar Code
mm	inch	R.P.M.		mm	PC			4081600

125 x 1,2 x 22,23	5 x 3/64 x 7/8	12200	-	10	1	GR	4125514	041149

CLEANING NON-FERROUS METAL, SOFT WOOD

Osborn Cup brush brass wire

Material friendly soft cleaning brush for larger surfaces. Suitable for non-ferrous metal and soft wood.W

Dimension mm			Speed	Content	Wire, Type	Item No.	Bar Code
Ø	T	G	R.P.M.	PC			4013349
60	21	M-14 x 2,0	12500	5	0,30 crimped brass wire	6912613561	931498

CLEANING ALLROUND

Osborn Cup brush abrasive nylon

Ideal to process larger surfaces. Abrasive nylon is used for cleaning, roughening, descaling, paint stripping, structuring, satinizing, weldseam cleaning and edge honing. All metals, hard- and soft wood as well as ceramics can be processed.

Abrasive nylon: Nylon filaments with silicon carbide. The trim adapts ideally to the profile of the work piece without damaging the surface. During use, new abrasive grits are continuously set free to ensure ideal cleaning performance. The result is a fine surface finishing. Additional grinding as a finishing step is not necessary.

Dimension mm			Speed	Content	Wire, Type	Item No.	Bar Code
Ø	T	G	R.P.M.	PC			4013349
60	21	M-14 x 2,0	12500	5	abrasive nylon, grit 80	6912613891	931504

Osborn Bevel brush abrasive nylon

Ideal to process hard to reach areas like angles, edges and corners. Abrasive nylon is used for cleaning, roughening, descaling, paint stripping, structuring, satinizing, weldseam cleaning and edge honing. All metals, hard- and soft wood as well as ceramics can be processed.

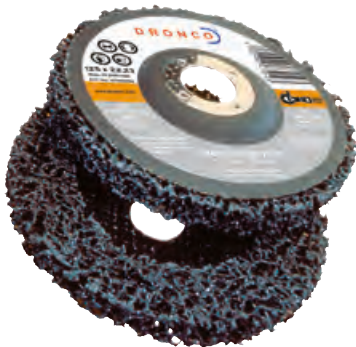

Abrasive nylon: Nylon filaments with silicon carbide. The trim adapts ideally to the profile of the work piece without damaging the surface. During use, new abrasive grits are continuously set free to ensure ideal cleaning performance. The result is a fine surface finishing. Additional grinding as a finishing step is not necessary.

CLEANING AND POLISHING ALLROUND

Dronco Coarse cleaning fleece GRV

Cleaning and Polishing tool

Suitable for cleaning and polishing of all surfaces. Removal of old paint, rust and welding spatter on metal without scratching the surface. Cleans plastics, wood, polishes stainless steel and removes thermal blueing.

Important: You don't need polishing compounds.

Description	Dimension	Dimension	Speed	Content	Item No.	Bar Code
	mm	inch	R.P.M.	PC		4081600
auf Gewebeteller	115 x 22,23	4 1/2 x 7/8	11000	10	6700001	670059
auf Gewebeteller	125 x 22,23	5 x 7/8	10000	10	6700002	670103

POLISHING COMPOUNDS

Osborn Polishing compounds white, brown, blue

Solid compounds

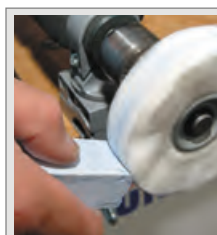

Polishing compounds and their role in finishing

Polishing compounds are essential for all polishing processes, because they contain the abrasive particles needed to achieve a particular surface finish. It is important to select the correct polishing compound for the material you plan to work on. Please see below information for your choice.

Important: No polishing compound is needed for satinizing because the abrasive particles are already embedded in the base material of the satinizing buff.

Colour	Content	Item No.	Bar Code

CUTTING

Osborn Polishing buff sisal

For the so called “cutting” as step one in a polishing process:
The removing of defects and scratches on a workpiece. Use polishing compound white to work on steel and stainless steel and compound brown to work on brass.

Dimension mm		Speed	Content	Item No.	Bar Code
Ø	G	R.P.M.	PC		4013349
100	M-14	9000	7	L940030842	931436

POLISHING

Osborn Polishing buff Notiflex soft

For the so called colouring (achieving a high-gloss surface).
Use polishing compound blue to work on steel, stainless steel, brass, copper and aluminum.

Dimension mm		Speed	Content	Item No.	Bar Code
Ø	G	R.P.M.	PC		4013349
100	M-14	9000	7	L911000436	931450

SATINIZING

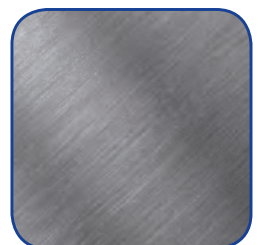

Osborn Satinizing buff non woven abrasive

For satinizing, deoxydising, light grinding and deburring, blending and fine grinding. To be used for wet and dry processes.

Important: Non woven abrasive tools are used without polishing compound. The abrasive particles are already embedded in the base of the non woven material.

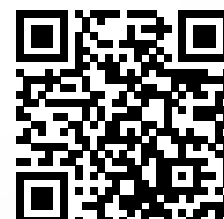

Dimension mm		Speed	Content	Item No.	Bar Code
Ø	G	R.P.M.	PC		4013349
100	M-14	9000	7	L960030577	931443
